

SHAURYA SRIVASTAVA

Lucknow, UP, India | +91-8840944144 | shaurya22256@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate (B.Tech, expected 2027) with hands-on project experience in Python, Django, and Machine Learning. Built full-stack and ML-based applications involving REST APIs, MySQL, and user authentication. Quick learner, eager to start my career in a Software Engineering role and contribute to real-world projects.

TECHNICAL SKILLS

- **Programming Languages:** Python, Core Java
- **Web Development:** Django, HTML5, CSS3
- **Backend Development:** MVT Architecture
- **Databases:** MySQL, SQL
- **Tools & Technologies:** Git, GitHub, VS Code, PythonAnywhere
- **Concepts:** Object-Oriented Programming (OOP), Data Structures, API Integration, SDLC

PROJECTS

Django Video Authentication — Django, JavaScript, MySQL, PythonAnywhere [Live Demo](#) | [GitHub](#)

- Built a full-stack video library platform using Django (backend) and JavaScript (frontend).
- Implemented secure user authentication with login, registration, and session management using Django's built-in auth system.
- Developed video upload and streaming functionality with support for multiple file formats.
- Integrated MySQL database for structured management of user data and video metadata.
- Designed RESTful APIs for seamless frontend-backend communication and dynamic content loading.
- Deployed the application on PythonAnywhere, enabling live public access.

Fake News Detection System — Python, Flask, Scikit-learn, TF-IDF, REST API [GitHub](#)

Assignment project — IBM PBEL Virtual Internship

- Built an ML pipeline using TF-IDF vectorization and a Passive Aggressive Classifier to detect fake news, achieving ~96% accuracy on test data.
- Developed a Flask backend that serves the trained model via REST endpoints, with a web UI for real-time headline/article input and prediction.
- Integrated a news-verification API to cross-check submitted content against live internet articles, displaying matching sources alongside the model's confidence score.
- Combined ML predictions with real-world evidence to generate a clear verdict (e.g., Likely Real/Fake), improving transparency and reliability of results.

VIRTUAL INTERNSHIP

IBM PBEL Virtual Internship | June 19 – July 31, 2026

- Building industry-ready expertise in Python, Artificial Intelligence, Machine Learning, and Data Analytics through experiential, real-world project development.
- Developed the Fake News Detection System as the practical assignment project, applying NLP, TF-IDF, and classification techniques to a real-world misinformation problem.
- Strengthened technical, analytical, and research capabilities to design innovative solutions and prepare for advanced technology and engineering roles.
- Applied theoretical AI/ML concepts to practical, real-world challenges under a structured, project-based curriculum.

EDUCATION

B.Tech in Computer Science Engineering (Pursuing) — Expected 2027

Babu Banarasi Das Institute of Technology and Management, Lucknow

Intermediate (Class XII), ISC Board — 91.5% | High School (Class X), ICSE Board — 95.6%

City Montessori School, Lucknow

ACHIEVEMENTS

- Completed 90-Hour Project-Based Summer Training on Core Java & Advanced Java by GRAS tech, BBD Campus, Lucknow (22 June – 5 Aug 2026).
- Certified Gold in Exploratory Data Analysis by NASSCOM FutureSkills Prime, Ministry of Electronics & IT, Govt. of India — scored 87% (22 July 2026).

SOFT SKILLS

Communication | Problem-Solving | Teamwork | Leadership | Adaptability | Creative Thinking | Time Management

LANGUAGES

English (Proficient) | Hindi (Native)
